## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1, 3 and 4 are allowed over the Prior Art of record.
2. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of the independent claim 1 is the inclusion of the limitations of an acoustic gas analyzer including the major elements recited in instant claim 1, however, specifically, including a signal processor comprising a filter acting on a first output amplitude from an acoustic velocity meter for *producing a time-dependent variation of the amplitude* (emphasis added) of the first output, and a temporally-adapted first output dependent on the probe time constant the represents a temperature of the gas at the detection time. None of the Prior Art disclose or teach this modification of the "amplitude" of the signal from the acoustic velocity meter via a filter, only the possible modification of the "frequency." The closest Prior Art reference is US 5,247,826 to Froila et al. which discloses an apparatus having a majority of the components of instant claim 1, however, fail to teach or disclose the specific operation on the time dependent amplitude signal via a filter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
